

IN THE UNITED STATES DISTRICT  
COURT FOR THE 2ND CIRCUIT  
SOUTHERN DISTRICT OF NEW YORK

UNITED STATES OF AMERICA,

v.

DAVID CORREIA

CASE NO. 19CR-725-3 (JPO)  
Motion

FOR COMPASSIONATE RELEASE  
18 U.S.C. 3582(c)(1)(A)(i)  
3142(b); 3553(a)

COMES NOW David Correia, a layman and ignorant of the law and presents this Motion for Compassionate Release. Mr. Correia incorporates this filing by reference into the above styled case and invokes the supremacy and Full Faith and Credit Clauses of the United States Constitution. SEE also 28 U.S.C. 1738, and United States Sentencing Guidelines (USSG) 1B1.13. This is Mr. Correia's sworn testimony and the four corner rule applies.

On March 22, 2021 Mr. Correia self surrendered to Butner (minimum security camp) after being sentenced to 1 year and 1 day. On August 2nd Mr. Correia filed for Compassionate Release with Warden Ramos (SEE Exhibit A).

As of the date of this filing there has been no response of the Warden Ramos. Therefore, Mr. Correia has satisfied the 30 day administrative remedy review and now seeks remedy from this Honorable Court due to the Extraordinary and compelling reasons promulgated by the Covid-19 pandemic and the abysmal efforts of Butner staff (medical and administrative) to keep Mr. Correia from grave harm.

## ARGUMENT

According to research letter published by JAMA, COVID-19 cases in U.S Federal and State prisons were 5.5 times higher - and death rates three times higher - than in the general population between March 21<sup>st</sup> and June 6<sup>th</sup>.

Mr. Correia moves for compassionate release pursuant to 3582(c)(1)(A), arguing that the persistent and still poorly understood novel corona virus, or COVID-19 and the Delta Variant, pandemic which public health experts and policy makers recognize is especially dangerous in the confines of correctional institutions, is an extraordinary and compelling circumstance warranting a reduction in sentence under the circumstances of his case.

Mr. Correia has never contracted COVID-19, but he is suffering from an autoimmune disease and is immuno-compromised with Chronic ulcerative colitis and is prescribed Humira treatment. Mr. Correia is a care level 3 and is 46 years old, and has had numerous flare ups and has to be prescribed steroids (Prednisone). (SEE Exhibit B (medical Records)).

Unfortunately, the evidence increasingly supports a belief that even those who have contracted the virus and recovered can become infected or reinfected. A recent first kind of its study showed that about 60% of patients had "Potent" anti bodies at the peak of their battle with the virus, but after 2 months, only 16.7% of patients still had "Potent" antibodies. As your Honor agreed I was to be sent to Jessup Camp where I could get adequate care, I was never sent there.

Because of his age, multiple serious health conditions, and already weakened condition due to his Auto immune disease, Mr. Carneu is among those at the very high risk of death or serious illness if he becomes exposed to COVID-19. Under the totality of the circumstances, as detailed further herein, it is respectfully requested that the court reduce Mr. Carneu's sentence to time served, or alternatively, modify his judgment to allow him to serve some or all of the remainder of his imprisonment sentence on home confinement.

### Exhaustion OF Administrative Remedies

The BOP's status of the exclusive gatekeeper for compassionate release motions ended with the enactment of the First Step Act on December 21, 2018. In a provision entitled "Increasing the use of Transparency of Compassionate Release," the First Step Act amended 3582 (c)(1)(A) to allow a sentence reduction for "Extraordinary and Compelling reasons" once the defendant "has fully exhausted all administrative rights to appeal a failure of the Bureau of Prisons to bring a motion on the defendant's behalf or the lapse of 30 days from the receipt of such a request by the warden of the defendant's facility, whichever is earlier."

A number of courts have already found that the plain text of the statute creates two alternative conditions: Either Exhaustion of BOP remedies or the passing of 30 days. SEE "United States v. Honey" No. 19-cr-541 (JSR) 2020 WL 821988, at 3 (S.D.N.Y.) (April 13<sup>th</sup>, 2020) (the statute "requires

the defendant either to exhaust administrative remedies or simply wait 30 days after serving his petition on the warden of his facility before filing a motion with the court"; United States v. Morgan, No. 4:92-cr-4013, Doc No. 2337 at 5-6 (N.D. Fla., April 27, 2020) (considering the motion because the defendant had waited more than 30 days). The words "after" and "whichever is earliest" indicate two alternative clocks started by the submission to the warden. After the earliest of those, the court has jurisdiction for a motion. By providing a 30-day lapse period, Congress specifically contemplated situations - such as the pandemic - wherein BOP would be unable to manage all urgent and potentially meritorious requests for release." SEE United States v. Ammerah, 2020 WL 222,0008 at 5 (E.D. of Michigan May 7<sup>th</sup> 2020).

Mr. Correia submitted his request to the warden on August 2nd 2021. He did not receive a denial of his request as of the date of this motion September 3rd 2021. The court possesses jurisdiction to consider Mr. Correia's motion.

### Mr. Correia's Medical Vulnerability to COVID-19 In the Prison Setting Warrants Extraordinary and Compelling Circumstances.

At 46 years of age, Mr. Correia suffers from a chronic and potentially life threatening autoimmune disease Ulcerative Colitis or (Chronic disease), as well as high cholesterol and obesity. SEE (MEOW) Records Exhibit B. Upon intake Mr. Correia was told he would be referred to see a GI Dr. and as of 9/3/21 he has not seen him.

He is on numerous medications such as Lialda 4.8 mg, Humira -1 injection every 15 days for Ulcerative Colitis, Alluprenal 300mg daily for heart, and Atorvastatin 4mg for High Cholesterol. Individually these conditions make him highly susceptible to serious complications if COVID-19 is contracted. Considered together, they establish that his continued presence in the FCI Butner Camp creates an unacceptable risk to his health and life, particularly given that he is non-violent offender with no criminal history, and outstanding Minimum PATTERN assessment scores.

Mr. Correia has also met with the Clinical Director of the Entero Complex Dr. Beyer and she put him in to see a Gastro-enterologist on 8/22/21 and its been 3 months and still have not seen a specialist. It is impossible to social distance as of 2 weeks ago Mr. Correia was given a cell mate in an 88 square ft. cubical. This is and goes beyond all conditions specified by the CDC which although focused on non prison populations, this research comes and becomes far more concerning when considered in the prison context, as prisons are well known tinderboxes for infectious disease. SEE United States v. TRAN 8:08-cr-197 Doc, Dkt No. 405 (C.D. Cal; April 10, 2020) ("while the court is aware of the measures taken by the BOP, news reports of the virus's spread in detention centers within the United States and beyond our borders demonstrate that individuals housed within our prison systems nonetheless remain particularly vulnerable to infection"). Pfizer agree's vaccine is not 100% and many vaccinated patients have become sick and died from new strains of COVID-19.

Butner has been identified as the most deadly prison in America for COVID-19 with over 35% of all deaths have occurred at Butner as well as 1 officer. One of the Courts Peers, Judge Allison J. Nathan from the United States District Court of the Southern District of New York, clearly makes her position known in United States v. Gerard Sepanta, 2020 U.S. Dist. Lexis 68935; 18cr-578 (A.J.N.) (April 20, 2020). SEE Lexis 7-10.

One quote of note: "The court notes the plain absurdity and of the Government's and the BOP's position." "The court speaks in stark terms: this is an illogical and self-defeating policy that appears to be inconsistent with the directive of the Attorney General, ungrounded in science and a danger to both Mr. Sepanta and the public health of the community."

The question of whether the government can protect inmates from COVID-19 is being answered in a negative way every day as outbreaks persist nationwide. This facility has no temperature check in place, no one wears masks, and we are sent to work off the complex and work with public and civilian contractors.

Although the circumstances of the present offense justified Mr. Cornein for the serious sentence that this court originally imposed, the sentencing purpose of just punishment does not warrant a sentence that includes exposure to a life-threatening illness which could cost him his life.

In response to the standard to grant a compassionate release motion, the USSC implemented 181.13, a policy statement specifically concerning compassionate release under 3582(c)(1)(A). In the application Note 1 to 181.13 four prongs are explained. Prong (D) based on other reasons "applies to Mr. Carrier." The Commentary to USSC 181.13 is a direct acknowledgment by the sentencing commission which is entirely consistent with the statutory text - that "extraordinary and compelling reasons" having nothing to do with the inmate's health, age, or family circumstances can support a sentence reduction under 3582(c)(1)(A). (See application Note 2... need not have been unforeseen at the time of sentencing to warrant a reduction in the term of imprisonment.")

While the commentary states that catchall category of "other reasons" will be determined by the Director of the BOP the reference to the BOP must be disregarded because it is irreconcilable with the post First Step Act (FSA) version of the statute, which allows the district court to grant relief under 3582(c)(1)(A). SEE United States v. Cento No. 1:05-cr-4581 (2019) WL 2498923 at 9 (S.D. Tex June 17 2019) ("Given the changes to the statute, the policy statement provision that was previously applicable to 18 USC 3582(c)(1)(A) no longer fits with the statute and thus does not comply with the congressional mandate that must provide guidance on the appropriate use of sentence modification provisions.

In Fact the eighth amendment's prohibition on cruel and unusual punishment includes unreasonable exposure to dangerous conditions while in custody. SEE Helling v. McInnes, 509 US 25, 28 (1993) SEE ALSO Walls v. Baldwin 70 F.3d 1074 (9th circ. 1995) (Applying Helling to asbestos); Brenn v. Mitchell, 327 F. Supp 2d 615, 650 (E.D. Va July 28, 2004) (Applying Helling to contagious diseases caused by overcrowding conditions".)

### 3553(A) FACTORS

Now that the "Extraordinary and compelling reasons" have been established, the court must consider the relevant sentencing factors in 3553(a) to determine whether a sentence reduction is warranted. Under Pepper v. United States the court also can and indeed must, consider post offense developments under 3553(a). Pepper 562 US 476, 490-493 (2011) (Authorizing the courts to consider the "most up to date picture" of the defendant's history and characteristics, which "sheds light on the likelihood that (the defendant) will engage in future criminal conduct"). The Corona virus pandemic and its concomitant risk to Mr. Carrien is of course, a very significant post sentencing development that should weigh heavily in favor of relief.

Mr. Carrien committed the instant, non violent offenses, while in his mid fifties, while his offense was indisputably serious, as the court knows from perusing of his sentencing the offense was non violent.

He had no criminal history at all and never has spent a day in jail. Mr. Correia was sentenced to 366 days and is housed at a minimum security camp and his PATTERN RISK assessment score is a minimum. While incarcerated Mr. Correia has completed numerous classes, works as an administrative orderly to the main training center and to the REM facility, which is an extremely sensitive and trustworthy position. Mr. Correia has already completed his release paperwork and thumb print has been obtained and is scheduled to be released in December this year 2021.

Mr. Correia has a viable release plan to live with his wife and kids. His wife is a physicians assistant and will be able to add Mr. Correia to her insurance and benefits. Mr. Correia has transportation and a home in Florida which he will reside in with his wife. Mr. Correia will be able to get better care for his disease outside rather than here at the prison and he is not safe here.

Also the 3553(a) factors and recognizing that under Brooker "when assessing a motion brought directly by an imprisoned person rather than by the BOP, the Court is neither constrained neither by USSC 181.13's enumeration of extraordinary and compelling reasons, nor by its free standing requirement that the defendant seeking release not pose a danger to the community".

The severity of (Defendants') conduct remains unchanged, what has changed however is the environment where he is serving his sentence. Zukerman 451 F. Supp. 3d at 236 ("when the court sentenced (defendant) the court did not intend for that sentence to 'include incurring a great and unforeseen risk of severe illness or death' brought on by a global pandemic." United States v Rodriguez 451 Supp. 3d 392, 407 (E.D. PA 2020) Moreover, the limited duration remaining on the defendant's sentence serves "as an additional consideration favorable to granting his motion for compassionate release. SEE United States v Pellegrino 492 F. Supp. 3d 65 (E.D. OF NY 2020).

## CONCLUSION

If the court believes a lengthy sentence is still called for however the 3553(a) factors can be met by converting Mr. Corne's remaining term of imprisonment to supervised release with a special condition of home confinement.

For the foregoing reasons, Mr. Corne respectfully requests that the court grant his 18 U.S.C 3582(c)(1)(A) motion for Compassionate release, and reduce his sentence to time-served. Alternatively, he requests that the court grant the motion and substitute a term of supervised release equivalent to his remaining term of incarceration with a special condition of home confinement, or other condition or terms that this court may find appropriate.

Respectfully Submitted this 3rd day of September 2021

Respectfully submitted,

Certificate of Service

I David Correia, on the 3rd day of September, 2021 did place a true and correct copy of the Motion for Compassionate release in the U.S. mail first class postage prepaid which is deemed received and filed when placed in the custody of prison officials for forwarding. (Mailbox rule - Houston v. Lack (1988)) and mailed to the, Clerk of Court, U.S.D.C of Southern District of New York.

Exhibit A  
TRULINCS 87302054 - CORREIA, DAVID - Unit: BUT-F-A

-----

FROM: 87302054

TO: BUT/Warden FCI-1

SUBJECT: \*\*\*Request to Staff\*\*\* CORREIA, DAVID, Reg# 87302054, BUT-F-A

DATE: 08/03/2021 03:33:00 PM

To: Warden Ramos

Inmate Work Assignment: training center

I am hereby filing an official request for compassionate release to be transferred to early home confinement under the authority granted to you under 18 U.S.C. 3582(a), as modified by the CARES Act of 2020. I meet all of the most recent Department of Justice (DOJ) guidelines concerning release to early home confinement under the CARES Act. I would still meet all of the standards under 18 U.S.C. 3553(a) if you modify my sentence as requested above.

The DOJ's most recent internal guidance, which supersedes the memorandum dated November 16, 2020, directs that: "during the COVID-19 pandemic, an inmate who presents one of the risk factors on the CDC list of conditions that, according to the data, definitively entail greater risk of severe illness, as confirmed by medical records, and who is not expected to recover from that condition, presents an extraordinary and compelling reason allowing compassionate release under the stature and guidance policy statement, even if in ordinary times would not allow for compassionate release.

It is a medical fact that I suffer from Ulcerative Colitis, a chronic, and currently incurable, auto-immune disease which effects the gastrointestinal tract. My body will always be more susceptible to illness, as a result of this disease. I am currently prescribed an expensive biologic medication (Humira) which is medically proven to further compromise my immune system (as listed in my Butner medical records). I have recently experienced flare-ups of my condition, compelling Dr. Beyer to prescribe strong steroids. In a medical appointment last week, Dr. Beyer shared with me that she is still trying to schedule an appointment for me with the gastroenterologist at the FMC. Unfortunately, I have not had even one appointment with a specialist since arriving at the camp on March 22nd of this year. Being an MCL-3, this is very frustrating, not to mention dangerous. When not incarcerated, I see my gastroenterologist once every three months for regular monitoring. It is apparent that I will receive much better medical care at home than is possible here at Butner.

I qualify as being eligible for relief under the CARES Act, as I meet all additional criteria, exclusive of a listed CDC chronic medical risk factor. My most recent combined PATTERN Score is a four (4) (and that is prior to several of my educational credits having registered), I am a first time non-violent offender with zero criminal history and no history of mental illness. I have an approved release plan (probation has done a visit of my home and approved it for release) and a loving and supportive family environment to be released into, etc.... I have under 5 months left until my original home confinement date of 12/16/21, and have already served more than 42% of my sentence. I would almost definitely have served over 50% by the time I would be released, should you agree to this request.

I am currently very concerned about contracting one of the COVID variants with my compromised immune system, especially since Pfizer has admitted the existing vaccine will not fully protect individuals against new variants. On a personal note, my wife, a highly respected hospitalist Physician Assistant of over 20 years, has had 4 FULLY VACCINATED patients die from over the last two weeks from the new Delta variant, with several more on ventilators. This is made even more distressing as new cases of COVID have appeared here on the Butner complex as recently as this past week. Therefore, I believe I have sufficient reason to be concerned for my safety and well being. My sentence from my judge was just, for the crime I pled guilty to, however, I was not given a death sentence. Having a wife and two children under 11 years old makes this a very scary situation to be in.

I meet the DOJ's most recent guidance for an extraordinary and compelling reason to be released to early home confinement under the CARES Act, and I meet the DOJ's and BOP's other criteria to be eligible under the CARES Act. Finally, a reduction of my sentence at this juncture, considering my unique set of facts and circumstances, still satisfies the standards of 18 U.S.C. 3553(a). Thus, I respectfully ask you to grant me compassionate release and transfer to early home confinement for the remainder of my sentence.

Sincerely,  
David Correia

**SUBJECTIVE:**

COMPLAINT 1      Provider: Beyer, Sara M.D.

Chief Complaint: GENERAL

Subjective: IM presents with concerns about:

\*Ulcerative Cholititis - IM is on Humira every 15 days and questions if he can go up on the dose or change to a different medication. (He has not been seen by GI, has referral pending, checked on statu snad requested he be seen next GI comes to the camp. IM claims double bunked and is concerned as gets up several times through the night with diarrhea from his ulcerative cholititis. Discussed I will update his MDS.

\*Immunocompromiseds - IM is concerned since he is on immunosuppressants that he might get a Coved variant and is trying to get home confinement but states he was denied by the Warden as IM claims he was denied because he had not served enough of him time. His medication for his UC suppresses his immune system.

Pain: No

(No appointment with G.I Specialist  
 Since I have been incarcerated,  
 3-22-21 → Self Surrender date and  
 today is 9-3-21)

Encounter Date: 04/30/2021 15:00			

Physical Therapy - Evaluation encounter performed at Health Services.

**SUBJECTIVE:**

COMPLAINT 1 Provider: Rogers, A. PT, DPT, GCS

Chief Complaint: Swelling

Subjective: Pt seen for physical therapy evaluation per referral from Dr. Beyer with the following request,

"IM states he used to wear ted hose and is having some edema and is wanting to be fitted for them again."

Pt reports that he recently came to prison a few weeks ago. Pt notes that as a teenager he had issues with Bil LE varicose veins and swelling with the L being worse than the R. Per pt, he has had 2 ablation procedures completed by a vascular surgeon in the community. Pt reports that he wore compression stockings to manage his swelling but did not bring the stockings with him from home. Pt reports no pain at this visit.

PMH: Hyperlipidemia, Anxiety Disorder, Ulcerative colitis, dermatitis (erythema/itching at genital area).

Pain: Pt goal: Pt would like a couple pairs of stockings to manage his swelling with activity.  
No

**OBJECTIVE:**

**Exam:**

**Skin**

**Vascular**

Yes: Varicose Veins

**Musculoskeletal**

**Ankle/Foot/Toes**

Yes: Swelling

**Ankle/Foot/Toes ROM and Tests**

Yes: Ambulating

**Comments**

Mild to Moderate Bil LE swelling in calf area L slightly more than R.

Large varicose veins covering Bil lower legs.

Girth measurements (cm): Calf= L 44.0, R 43.5 and Ankle= L 26.5, R 25.5

Treatment: Issued 2 pairs of JOBST below knee compression stockings X-Large, 20-30 mmHg

**ASSESSMENT:**

**Other**

Pt with h/o of significantly large varicose veins at Bil lower legs Left > Right. Prior to coming to prison recently, pt tolerated and managed his condition with compression stockings. Pt will benefit from compression stocking wear to manage swelling and potential venous insufficiency complications.

March 16, 2021

Clinical Director  
SCP Butner  
Butner, NC

RE: David Correia (DOB 03/03/1975)

To Whom It May Concern:

Mr. Correia is a patient in my office who is under my care for several chronic health conditions. He is currently being treated with Allopurinol 300mg (1 tab daily) for maintenance of gout, Colchicine 0.6mg (1 tab daily as needed for gout flair-ups) and Klonopin 0.5mg (1 tab three times/day) for anxiety. He is also required to use compression stockings daily for his chronic varicose veins on his left leg; these are to prevent swelling and skin ulcers. If you have any further questions, please contact my office.

Sincerely,

Timothy Willingham, M.D.

Fax: 561-619-7864

To the Clinical Director at SCP Butner--

I am the gastroenterologist who has been managing David Correia for his ulcerative colitis. Mr Correia has been on Lialda (four tabs of 1.2 g by mouth daily) with intermittent prednisone for his ulcerative colitis. Based on his clinical symptoms and my recent colonoscopy I believe he needs the following treatment regimen: I have put him on Canasa suppositories 1 g per rectum for 6 weeks with a plan to get him started on Humira injections (160 mg subcutaneously on day 1 followed by 80 mg subcutaneously on day 15 followed by 40 mg subcutaneously every 2 weeks). I believe this would be the best therapy for him and would lessen the likelihood of ulcerative colitis flares.

Please let me know if you have any questions or would like to speak to me for further clarification.

Sincerely,

Naveen Reddy, MD  
561-619-7620
